**REPORTS AND RECOMMENDATIONS BY THE COMMISSIONER OF HIGHER EDUCATION**

Commissioner Joseph Rallo thanked the staff for the work accomplished during the legislative session. He said that the Board has set aspirational goals and adopted the theme “Elevate Louisiana.”

During the Commissioner’s Report, Dr. Rallo asked Dr. Lisa Vosper, Associate Commissioner for Workforce Education and Training, to update the Board on activities in which she has been involved. Dr. Vosper shared that the National Geospatial-Intelligence Agency’s (NGA) Centers of Academic Excellence (CAE) program is a partnership between NGA and academia to ensure an adequate supply of geospatial sciences expertise near term and
into the future. She has met with one of NGA’s CAE lead subject matter experts (SMEs) on the
information technology branches for geospatial science and has developed a campaign targeted
at education systems that have the capacity to partner with NGA across multiple areas in the
geospatial sciences. She explained that there is an opportunity for the Louisiana Board of
Regents to partner to create the first-of-its-kind program with a State’s entire academic
network.

To address CAE’s diversity goal, Dr. Vosper is leading efforts with the state’s
Historically Black Colleges and Universities (HBCUs) to identify areas of synergy and
excellence that would meet the requirements of the CAE Initiative. This initiative goes beyond
the traditional boundaries of geospatial sciences, touching cyber security, political science,
maritime and even business and workforce development.

Dr. Vosper explained that based on the key points in Elevate Louisiana, she believes that
there may be synergies between Regents’ efforts in the “Innovate” focus area and the work with
NGA. She will keep the Board apprised of progress in this regard.
